*The NSRAA - SHELDON JACKSON COLLEGE HATCHERY  
COOPERATIVE CHUM PROGRAM*

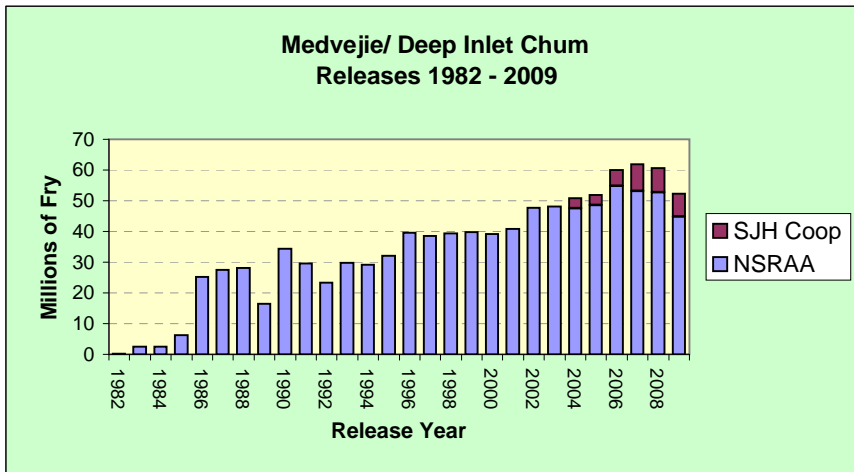

*Beginning with brood year 2003, a component of the Deep Inlet chum program is a cooperative chum program with Sheldon Jackson College Hatchery (SJH) and NSRAA. Initially 3-5 million of the fry released at Deep Inlet are included in the project; beginning with brood year 2006, the number was increased to 8.5 to 9 million fry.*

*The first fry release for the program was in the spring of 2004, and the first adults returned in 2006.*

*The project is designed to provide many real-world educational opportunities to SJ fishery students and will aid in funding the SJ Fisheries program, which has provided NSRAA with numerous employees over the years.*

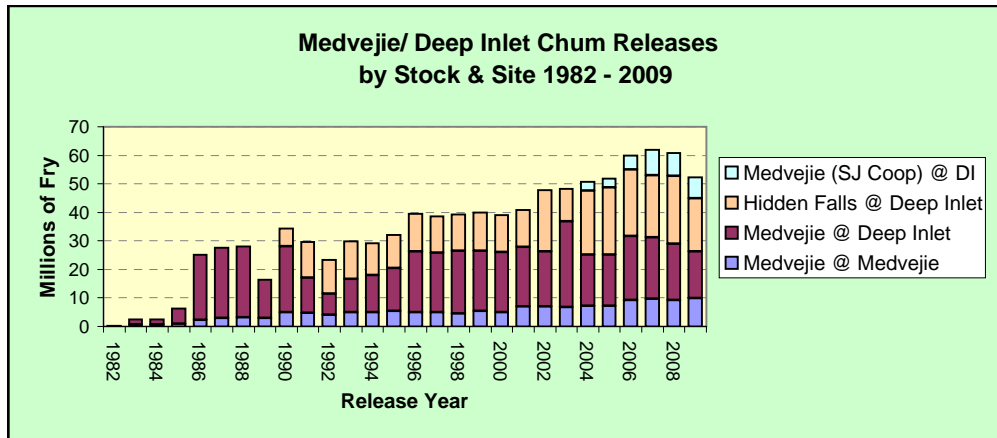

*In this data section; release and return data will be tracked both for the entire return as well as splitting out the NSRAA-SJH Cooperative component. Where not specified, the data is for the entire release or return - including both NSRAA production and the cooperative production.*
