

## NSRAA THA SCHEDULES - 2024

Deep Inlet	Sun	Mon	Tue	Wed	Thu	Fri	Sat
	Seine	Gillnet	Gillnet	Gillnet	Seine	Seine	Troll

**Begin:** Sat, June 1 with Deep Inlet proper area restrictions for cost recovery (Deep Inlet closed from neck of Deep Inlet to head of bay). Full THA should open on or around July 1.

**2024 chum forecast** = 1,427,000 early run, 1,027,000 late run (both Deep Inlet and Bear Cove)

**Chum broodstock needed** = 22,500 summer chum and 90,000 - 110,000 fall chum (sex ratio dependant)

**Cost Recovery:** = NSRAA will be targetting Medvejie chum in 2024, to fulfil roughly 40% of the organizations total cost recovery needs for the year. Areas tha cost recovery is expected to occur include Deep Inlet, Silver Bay, and the Eastern Channel portion of the SHA. By regulation, the Eastern Channel portion of the SHA will not open to cost recovery until July 1st, so most cost recovery will occur within Deep Inlet proper until then. The outer portion of the Deep Inlet THA will open to commercial fishing on Sunday, June 1 with a seine day but area will likely remain restricted until July 1. Cost recovery will be managed on a day to day basis and fishermen are encouraged to check the NSRAA website and ADF&G news releases for updates.

Crawfish Inlet	Sun	Mon	Tue	Wed	Thu	Fri	Sat
	Seine					Seine	

**Begin:** Late July with cost recovery; one day/week seine openings may occur to assist in terminal buildup as needed; will open to seine upon completion of cost recovery

**2024 chum forecast** - 1,336,000

**Cost Recovery:** = NSRAA will be targetting Crawfish chum in 2024, to fulfil roughly 40% of the organizations total cost recovery needs for the year. Cost recovery will occur primarily at the back half of the bay unless more aggressive harvest is necessary to maintain quality. Some cost recovery may take place in West Crawfish if there is a build-up of fish at the head of the bay. West Crawfish cost recovery would occur at the direction of ADF&G.

**Troll:**

Trolling is open in **West Crawfish Inlet** throughout the return.

Trolling may be closed in **Crawfish Inlet** when cost recovery boats are present and will be open on non-seine days after cost recovery is complete.

Hidden Falls	Sun	Mon	Tue	Wed	Thu	Fri	Sat
	Seine					Seine	

**Begin:** Sunday, June 16

**2024 chum forecast** - 1,553,000

**Chum broodstock needed** =240,000+ (sex ratio dependant). Some area restrictions may occur to protect broodstock.

**Cost Recovery:** = No 2023 Hidden Falls Assessment Tax; A small cost recovery harvest will take place during non-seine days to assist in broodstock management.

Southeast Cove	Sun	Mon	Tue	Wed	Thu	Fri	Sat
	Seine	Troll	Gillnet	Gillnet	Seine	Troll	Troll

**Begin:** Sunday, June 16

**2024 chum forecast** - 215,000 (Southeast Cove), 211,000 (Gunnuk Creek)

**Cost Recovery:** Cost recovery will occur at Southeast Cove as well as Gunnuk Creek. Harvest goal for the Southeast Cove component is roughly 60,000 fish which will be harvested in addition to any Gunnuk Creek surplus in the Gunnuk Creek SHA. If cost recovery goals cannot be met during non seine and gillnet days then a brief closure may occur near the peak of the run.

Thomas Bay	Sun	Mon	Tue	Wed	Thu	Fri	Sat
	Seine					Seine	

**Begin:** Sunday, June 16

**2024 chum forecast** - 381,000

**Cost Recovery:** None
